COIMBATORE INSTITUTE OF TECHNOLOGY, COIMBATORE-641014

(Government Aided Autonomous Institution, Affiliated to Anna University, Chennai)

DEPARTMENT OF PLACEMENT CELL

ACADEMIC YEAR 2025-26

STUDENT FEEDBACK

Student Name: Shajithrooban Gunasekaran

Roll number: 71762131045

Department: Msc Software Systems

Personal email id: shajithrooban03@gmail.com

Contact number: 9489425649

Company name: Zoho

Company type: IT – Non Dream

Salary (ctc): 7 LPA

Intern offered: Yes

Bond: No

(Please comment this section in detail to guide your juniors in a bright way)

COMMENTS ON SELECTION PROCESS:

ROUND 1

Platform used: Offline (Pen and Paper)

Round details:

10 technical and 10 quantitative aptitudes fill-in-the-blanks type without choices which should be completed in an hour.

Topics/Areas Covered:

Technical aptitude: Output prediction, code completion in C, C++ or JAVA. Mostly based on pointers, recursion, operator precedence, loops, arrays, pattern printing, etc.

Quantitative aptitude: Basic aptitude questions on topics such as ratios, problems on train, problems on boats and stream, profit and loss, allegations, etc.

Your Comments:

- Try to focus on completing a greater number of questions rather than focusing on difficult ones.
- Decide which section you are good at and attempt that first.

Did you clear this round? **Yes**

Details about questions on 1st round:

DOMAIN	QUESTION	Your Approach / Solution	REFERENCES (If any)
Technical	Arrays, Patter printing, Loops, operator precedence etc.	**Try to dry run the problems and trace it in rough paper.**	https://github.com/pradeepkumar24rk/ZOHO-interview-Questions/blob/master/Round%201/Zoho%20-%20Round%201%20-%20Questions

Quantitative	Ratios, problems on train, problems on boats and stream, profit and loss, allegations, etc.	**Practice on all the topic before hand**	https://prepinsta.com/zoho/aptitude/

ROUND 2: Coding round

Platform used: Your own IDE (I used dev C++)

Round details:

6 programming questions that should be completed within 3 hours. If no or little progress is found, you will be sent before the time is up.

Topics/Areas Covered:

- DFS/BFS
- Dynamic Programming
- Binary Search
- Pattern printing
- Matrix

Your Comments:

I completed 5 out of 6 questions. Try to remain calm and focus on completing as many questions as possible first. Be interactive with the mentor and clearly explain what you are doing—for example, the time and space complexity, and the technique you are using.

Did you clear this round? **Yes**

Details about Questions on 2nd round:

DOMAIN	QUESTION	Your Approach / Solution	REFERENCES (If any)
DFS/BFS	Given an m x n 2D binary grid grid which represents a map of '1's (land) and '0's (water), return the number of islands. An island is surrounded by water and is formed by connecting adjacent lands horizontally or vertically. You may	**I started with DFS, and once I completed it, the mentor asked me to solve the problem using BFS.**	https://leetcode.com/problems/number-of-islands/description/

	assume all four edges of the grid are all surrounded by water.		
Matrix	Spiral Matrix	**Nested Loops**	https://leetcode.com/problems/spiral-matrix/description/
Strings	Given a string s, find the length of the longest substring without duplicate characters.	**Unordered map**	https://leetcode.com/problems/longest-substring-without-repeating-characters/description/
Matrix	Given a matrix of size M×N and an integer sum, find all unique pairs of elements from different rows whose sum equals the given value	**Sets and Unordered map**	
DP	Given a set of denominations and a target amount, find the minimum number of coins/notes required to make up the target amount. Print the count of each denomination used. If it is not possible to form the target amount, return -1.	**I used greedy approach at that time since I only had less time left. Passed all test cases except 1 edge case.**	https://leetcode.com/problems/coin-change/description/

Areas to prepare:

- **Normal competitive programming questions.**

Sites / books you suggest for preparation for the process:

- **Leetcode 75**
- **TUF DSA Sheet**

ROUND 3: Advanced Coding round

Platform used: Your own IDE (I used dev C++)

Round details:

- They will ask you to design a low-level application using oops
- Multiple tasks will be given which should be completed sequentially

Topics/Areas Covered:

- Low-level design, OOPS

Your Comments:

- Focus on completing the task rather than optimization.
- Be Interactive with the mentor.
- After completion of each task show it to the mentor.

Did you clear this round? **Yes**

Details about Questions on 3rd round:

DOMAIN	QUESTION	Your Approach / Solution	REFERENCES (If any)
System Design	Develop an e-wallet application that manages payments, generates OTPs before transactions, links bank accounts, enables purchases, maintains transaction history, provides password management, generates weekly and monthly reports based on	**Refer the links given**	https://github.com/rooban33/E-Wallet-ZOHO-round-3- https://github.com/pradeepkumar24rk/ZOHO-interview-Questions/blob/master/Round%203/Zoho%20-%20Round%203%20-%20Questions.md

	categories, supports date-based filtering, allows balance checking, and enables e-wallet account top-ups.		

ROUND 4: Technical interview

Platform used: Face to Face, Zoho meeting

Round details:

- Questions based on your resumes, based on your previous rounds and puzzles

Topics/Areas Covered:

- Resume, puzzles

Your Comments:

- This round was conducted twice for me — first as an offline face-to-face interview, and again the next day after the interviewer had reviewed my project work from GitHub and LinkedIn.
- Be thorough with what you include in your resume.
- Prepare by going through common puzzles asked in interviews.

Did you clear this round? **Yes**

Details about Questions on 4th round:

DOMAIN	QUESTION	Your Approach / Solution	REFERENCES (If any)
Technical Questions	• MAC vs IP address • React vs Angular • Encryption techniques • Promise, async await, callbacks • Event loops • Firewall Related Ques	**These were asked from resume so prepare your resume**	

Puzzles	• 25 horses puzzle • 3000 bananas camel puzzle • Find the Jar with Contaminated Pills • 100 coins puzzle	**Go through the common puzzle questions available online.**	

ROUND 5: HR interview

Platform used: Zoho meeting

Round details:

- Basic questions to check cultural fit.

Your Comments:

- Questions regarding why zoho?, discussion regarding relocation, compensation and candidate and family background

Did you clear this round? **Yes**
