COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

PLACEMENT AND TRAINING CELL

PLACEMENT YEAR 2021-2022

NAME	:	Akkash N.S
ROLL NUMBER	:	1731004
DEPARTMENT	:	M.Sc Software Systems
EMAIL ID	:	akkash.ns@gmail.com
CONTACT NUMBER	:	9003875334
COMPANY NAME	:	Zoho
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	Software Developer
SALARY (CTC)	:	7lpa
INTERN OFFERED ?	:	YES
BOND	:	NO
HAVE YOU PLACED ?	:	YES

*(Please comment this section **in detail** to guide your juniors in bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 : Aptitude

Platform: Zoho online test

Round details: General and Technical aptitude

Areas covered: Program output , increments, pointers, loops

Your Comments: Strong fundamental in programming will help you clear the round.

Have you cleared the round : YES

ROUND 2 : Task(mini project)

Platform: any

Round details: Coding round.

Areas covered: c++ concepts

Your Comments: The task was simple and ample time was given.

Have you cleared the round : YES
Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
OOPS	Flight booking with multiple scenarios.	Avoid built in functions and use class objects , methods and sound logic to implement the given scenario	

ROUND 3 : Technical hr - I

Platform: Zoho meet

Round details: Technical round

Areas covered: OOPS concepts and data structures.

Your Comments:
Technical questions based on the task , areas of interest and projects mentioned in the resume were asked.

Have you cleared the round : YES

Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Task	Questions based on the given task.		
Strings	Pattern matching	Used for loops with appropriate conditions.	Geeks for geeks
DSA	Types of sorting and searching algorithms	Logical working of each algorithm was explained	Geeks for geeks
React (Intern project)	How does live video meet or streaming works?(since my intern project was video meeting web-app)	I explained the general working of WebRTC	Webrtc.org
Blender (area of interest)	How does image rendering works in blender?		
Gaming (area of interest)	Difference between a ram and graphic card?		
	Why graphic card is necessary for gaming?		

ROUND 4 : Technical hr - II

Platform: Zoho meet

Round details: Technical round

Areas covered: Logical thinking

Your Comments: Basic questions to test your logical thinking.

Have you cleared the round : YES

Details about Questions on 4th round:

1. How will you cut a cake into 8 pieces with 3 cuts?
2. How high a batsmen can score if he faced all the balls in t20 match with all regular rules?
3. What is webRTC?
4. Puzzles
5. Questions based on my project and intern.

ROUND 5 : General hr

Platform: Zoho meet

Round details: HR Round

Your Comments: Basic hr question was asked.

Have you cleared the round : YES

Details about Questions on 5th round:
1. Intro
2. Why zoho?
3. About family.
4. Are you willing to move to Chennai?
5. Salary expectations
6. Any other offers in hand
7. Previous interview experience

AREAS TO PREPARE :

- Be Strong in coding skills.Try to give optimized solution.
- Cover major topics in OS,DBMS,DSA
- Be strong in any one of the coding languages.

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

GeeksForGeeks
LeetCode
HackerRank
HackerEarth

OVERALL EXPERIENCE :

It is a good experience. The HRs were so friendly and encouragable ,so that u can answer without any pressure or fear.

GENERAL TIPS :

Be strong in fundamentals and code regularly.

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

PLACEMENT AND TRAINING CELL

PLACEMENT YEAR 2021-2022

NAME	:	VENO D
ROLL NUMBER	:	1731057
DEPARTMENT	:	M.Sc Software Systems
EMAIL ID	:	venodpi@gmail.com
CONTACT NUMBER	:	9942884370
COMPANY NAME	:	Zoho
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	Software Developer
SALARY (CTC)	:	7LPA
INTERN OFFERED ?	:	YES
BOND	:	NIL
HAVE YOU PLACED ?	:	YES

COMMENTS ON SELECTION PROCESS :

ROUND 1 :

Platform : Zoho Online Test

Round details : General & Technical aptitude

Areas covered : Predict program output, Chaining pre-increment and post-increment, size of data type and pointers, flow control of loops.

Your Comments : The Questions were of easy to normal level, good practise in C fundamentals and aptitude will help in clearing this round.

Have you cleared the round : YES

ROUND 2 :

Platform : Zoho Meet

Round details : Code Pair Round

Areas covered : Array, Linked List

Your Comments : Basic knowledge of CS fundamentals

Have you cleared the round : YES

Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Programming (Easy)	Arrange array elements in the descending order of their frequency. **Input Format** Length of array : 8 Input array : [4,1,2,3,1,2,5,2] **Explanation** 4's=1, 1's=2, 2's=3,3's = 1, 5's = 1 **Output Format** 22211435	Used HashMap to count the frequency of each character and printed it in descending order of frequency.	Problem Link

Programming (Easy)	Sort the elements of an array in the odd index in ascending order and the elements in the even index in descending order. (Note : You must only use one array for this operation) **Input Format** Length of array: 9 Input array : 10 7 1 -1 4 -10 6 15 21 **Explanation** Odd Position Elements : {10, 1, 4,6, 21} --> {1, 4, 6, 10, 21} Even Position Elements : {7,-1,-10, 15} --> {15, 7, -1, -10} **Output Format** 1 15 4 7 6-1 10-10 21	Altered Bubble sort to sort odd and even index based elements.	Problem Link
Data Structures (Easy)	Given a linked list that contains 0,1 and 2. Sort this linked list such that it contains 0s first, then 1s and then 2s in a single loop. **Input Format** N=8 List Elements : 1 0 1 0 2 0 2 0 **Output Format** Output: 0 0 0 0 1 1 2 2	While traversing the list, if 0 then add to the head of list, if 2 then add to the tail of list, if 1 do nothing.	https://www.techiedelight.com/sort-linked-list-containing-0s-1s-2s/
Programming (Medium)	For the given number of rows, write a program to print the pattern mentioned in the example. **NOTE:** The exact format above should be printed not as a single string. **Input Format** Input String : ZOHOISHIRING Number of Rows : 3 **Output Format** Z I R O O S I I G H H N	Find the pattern or sequence of characters printed. Used sRange and eRange and printed each sequence separated by spaces.	https://leetcode.com/problems/zigzag-conversion/

Programming (Medium)	A is sending a chat message to B, the message gets split into packets with different sizes. At the B end, the device receives the packets in a different order (not in the order in which it was sent). The device should show the exact message in the same order to B which was sent by A. It needs some buffer to store the intermediate packets (which will be used for re-ordering the packets). **NOTE:** If the right order message comes, it won't be stored in the buffer. Only store the packets that were not in order. In case if the correct order comes in, read the packet without storing it in the buffer. Print the message in the correct order which was sent by A and also Identify the buffered packet which has the maximum length? **Input Packet Format** **Packet structure :** 1st part - Packet ID at the Eve side 2nd part - Hyphen b/w 1st and 3rd part. 3rd part - The packet message Sample : "2-Good Morning" **Input Format** Enter number of packets : 5 P1: "5-You." P2: "1-Hi" P3: "3-1" P4: "2-Adam!" P5: "4-Love" **Output Format** Message: Hi Adam! I Love You. Buffered packet with maximum length: 7 - For P5: "4-Love"	Simulation of UDP	

ROUND 3 :

Platform : Zoho Meet

Round details : Long Coding Round

Areas covered : OOPS

Your Comments : Should be strong in OOP implementation

Have you cleared the round : YES

Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
OOPS	To simulate ATM Operations like Withdrawal, Transfer, Deposit, Load cash into ATM.	Modularity programming, try to avoid in-built functions and design class and methods to implement those.	

ROUND 4 :

Platform : Zoho Meet

Round details : Technical Round

Areas covered : Resume, OOPS, DBMS, Logical reasoning

Your Comments : Be strong in CS fundamentals

Have you cleared the round : YES

Details about Questions on 4th round:

1. Questions from Resume
2. Basic Questions from the programming languages of your choice
3. Asked to explain any one elaborately and Questions related to the project
4. Puzzles
5. Design a database for a school and write a query for different situations.
6. How do you recommend any stack that I liked the most to others who are unaware about it and why?
7. As I did my projects on the web, Questions like how Local Storage, Session Storage and Cookies are managed in the browser.

8. Oops Concepts and real life examples.
9. How do non-object oriented languages overcome OOPS implementation.
10. SQL vs NoSQL
11. Do you have interest in working as a network security engineer?

ROUND 5 :

Platform : Zoho Meet

Round details : Technical Round

Areas covered : Resume, Networking Basics, Testing, Situational Awareness

Your Comments : Be strong in CS fundamentals

Have you cleared the round : YES

Details about Questions on 5th round:

1. Questions from Resume
2. What is CDN
3. Basic Question from Testing
4. Situation based Questions regarding work at Zoho

ROUND 6 :

Platform : Zoho Meet

Round details : HR Round

Your Comments : Typical HR Round

Have you cleared the round : YES

Details about Questions on 6th round:

1. Tell me a short intro about yourself.
2. Why M.Sc? Why not B.E or any other degree?
3. Why Zoho?
4. Explain any one project in a few lines.
5. About family.
6. Salary expectation
7. Willing to relocate?
8. Do you have any other offer in hand

AREAS TO PREPARE :

- Quantitative Aptitude
- Problem Solving
- CS Fundamentals
- Logical Reasoning
- Data Structures, DBMS, OS and Computer Networks
- OOP Concepts
- Strong in OOP Languages(Java/C++/C#/Python),

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

- **Quantitative Aptitude**
  - TalentSprint Aptitude Prep (YouTube)
  - Indiabix
- **Technical**
  - Data Structures - Jennys lectures, Vivekanand Khyade
  - OS - Parnika tutorials
  - Networks - Neso Academy
  - DBMS - Jennys lectures, freeCodeCamp
- **Problem Solving**
  - Leetcode

OVERALL EXPERIENCE :

- Most of the Questions were from basics.
- Be patient till you get the final solution, don’t get tense when you are stuck.
- All the interviewers were friendly.
- Feel free to ask for doubts and suggestions.
- Be ready with questions to ask at the end of the interview.

GENERAL TIPS :

- Keep practising coding daily.
- Be strong in CS fundamentals and DSA.
- Explain your approach confidently and how you arrived at the solution.
- Know your resume.
-

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

PLACEMENT AND TRAINING CELL

PLACEMENT YEAR 2021-2022

NAME	: Anesh P
ROLL NUMBER	: 1732007
DEPARTMENT	: M.Sc Data Science
EMAIL ID	: aneshpugal1999@gmail.com
CONTACT NUMBER	: 9944998858
COMPANY NAME	: Zoho
COMPANY TYPE	: NON-DREAM
JOB DESIGNATION	: Software Developer
SALARY (CTC)	: 5.6 Lpa
INTERN OFFERED ?	: YES
BOND	: NO
HAVE YOU PLACED ?	: YES

*(Please comment this section **in detail** to guide your juniors in bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 :

Platform: Zoho's own platform

Round details: MCQ (25 questions – 10 Aptitude + 15 Code snippets) – 1.5 Hrs

Areas covered: Java - OOPS
C - Output based questions, operators
Aptitude - Basics

Have you cleared the round : YES

ROUND 2 : Programming Round (7 Questions) – 3 Hrs

Platform: Zoho Meetings

Round details: In L2 round I was given 7 coding questions and the duration given was 3 hrs. After completing each coding question we have to show the code and they will give some test cases. Once the interviewer is satisfied with the output, then we have to explain the code. I completed 5 coding questions. The number of questions to be solved to next round depends on the persons conducting.

Areas covered: Strings, Array Manipulation, Matrix

Your Comments:

Have you cleared the round : YES
Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
	Sort numbers 0 to 99 by converting the given number to words. Input: 7,8,1,3, 32, 34. Output: 8, 1, 7, 34, 32, 3 Explanation: Input number names are Seven, Eight, One, Three, Thirty two, Thirty four. Arranging these words in alphabetical order will		https://www.geeksforgeeks.org/sort-an-array-alphabetically-when-each-number-is-converted-into-words/

	give the output as above		
	Given two strings of the same length. Compare the strings and print all pairs of substrings (min 2 char) that do not match with each other. Print them for both the strings, that do not match with the other string. Input: Enter the first string: tenant Enter the second string: tenure Output: In string 1: tena, tenan, tenant, ena, enan, enant, na, nan, nant, an, ant, nt In string 2: tenu, tenur, tenure, enu, enur, enure, nu, nur, nure, ur, ure, re		
	Given a 2D matrix (max size 10x10), starting from top left and ending at bottom right, print the path which will give the maximum sum-Note: You can travel only in right and down directions Input 1: 10 20 2 40 Output Path is 10->20-40 and the sum is 70.		https://www.geeksforgeeks.org/maximum-sum-path-in-a-matrix-from-top-left-to-bottom-right/

	Write a program that will evaluate an expression for the operators +,-, , and do the calculation in line with BODMAS rule and give the output.		
	There are N number of people in a group who play a game by standing in a circle. The group starts counting from one and each person who counts a multiple of x (0<=x<=N/2) will be eliminated and the group starts counting again. The game stops when the number of people remaining are less than x. Write a program to print the people who will be eliminated in the order of their elimination for a given N,x combination. Input: N=6, x=3 Output: 3642 Explanation: Initial line: 1 2 3 4 5 6 First round: 4 5 6 1 2 (after eliminating 3, counting starts from person4) Second round: 1 2 4 5 (after eliminating 6, starts from person1) Third round: 5 1 2 (after eliminating 4, starts from person5) Fourth round: 1 5 (stops as remaining 2<x)		

	Given a set of elements and 2 search elements, find the minimum distance between the elements in the given array. The array may have duplicate values, however the search elements must be different.		https://www.geeksforgeeks.org/find-the-minimum-distance-between-two-numbers/
	Write a program to find the nearest distance from 1's in a 2D binary array (diagonal Inputs: Matrix size (max 5 rows 5 cols), Matrix elements row wise.		

ROUND 3 : Long Coding Round

Platform: Zoho Meetings

Round details: In L3 round I was given 1 long coding question with 5 modules and the duration given was 3 hrs. After completing the question we have to show the code and they will give some test cases. Once the interviewer is satisfied with the output, then we have to explain the code.

Areas covered: OOPS , LLD

Your Comments:

Have you cleared the round : YES
Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
	Implement following modules, implementation functionalities. 1. Get input from two flights – 101 and 102 with		https://github.com/Someshbose/zoho

	different passengers for each flight. 2. After booking seats, display the seat number to the passenger. 3. The meal has an additional charge which has to be included 4. Surge pricing was that every ticket (business/ economy) was incremented by a specific price after each successful booking. 5. A flight summary has to be displayed. 6. Cancellation of flights should be done. The refund should be calculated properly.		

ROUND 4 : Technical Round 1

Platform: Zoho Meetings

Round details: This round was split into 2 technical rounds and the duration was 1.5 hr totally. First technical round was for 1 hr and the second technical round for ½ hr. Both were conducted separately.

Areas covered: OOPS, OS, NETWORKS, PYTHON, DBMS

Your Comments: Be strong with the basics don't lose confidence when one or two questions weren't answered try to match up with examples while explaining.

Have you cleared the round : YES
Details about Questions on 4th round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Design	Design for IPL tournament , like identifying actors , functionalities.		
DBMS	Normalization, Concurrency, Queries , SQL vs NoSQL , keys		

OS	Deadlocks, threads, multithreads, synchronisation, was asked to code thread, monolithic kernel, State diagrams		
OOPS	Asked to screen share and implement OOPS concept, keywords		
Other including Resume	API, API types, Architectures, Cloud Computing, Serverless computing, Digital electronics – de morgan's law		
Networks	Tcp , udp , tcp vs udp , OSI layer , protocols ,		

ROUND 5: GENERAL HR ROUND

1. What do you know about Zoho?
2. Why Zoho?
3. Any present offers and number of companies attended before?
4. What is your Vision?
5. About Family Background
6. Why Software development role ?
7. Willing to relocate?

AREAS TO PREPARE :

- General and technical aptitude.
- Coding.
- Be strong in fundamentals in C, Java, DBMS, Data Structures, Networks, OS.
- Low level Design
- Resume
- Good to have a software project while applying for Software roles.

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

Aptitude:

- Feel free to learn (YouTube)
- Indiabix (app)
- Javatpoint

Coding and Technical:

- GeeksforGeeks
- Leetcode

- W3 Schools
- InterviewBit (Highly recommended solve the given questions given in each bucket)
- beginnersbook

OVERALL EXPERIENCE :

The process was a bit longer than other companies but the overall experience was good and the interviewers were very friendly and had a positive experience with no pressure at all.

GENERAL TIPS :

- Go through the previous year feedback, gfg archives of the company to be attended.
- Don’t lose confidence if one or two questions gets wrong or you don’t know.
- It is good to have projects or coursework for the role that you’re applying for.
- Practice coding on regular basis.
- Good knowledge on computer fundamentals would be helpful.

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

PLACEMENT AND TRAINING CELL

PLACEMENT YEAR 2021-2022

NAME	:	VIJAY ANAND V
ROLL NUMBER	:	1732057
DEPARTMENT	:	M.Sc. (Data Science)
EMAIL ID	:	vijaysuryavelshan@gmail.com
CONTACT NUMBER	:	9080810390
COMPANY NAME	:	ZOHO
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	Software Developer
SALARY (CTC)	:	7 LPA
INTERN OFFERED ?	:	YES
BOND	:	NO
HAVE YOU PLACED ?	:	YES

*(Please comment this section **in detail** to guide your juniors in bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 :

Platform:
Online test is conducted in ZOHO platform (zohoonlinetest.thinkexam.com)

Round details:
This round contains basic aptitude, technical and programming questions. In the programming session we need to find the output of the code given, which will be given as a pseudo code or written in C or C++

Time Interval: 1 hour 30 minutes

Areas covered: Basic Data Structures and Quantitative Aptitude

Result announcement: < 2 hours

Your Comments: Some past practices in programming and aptitude helps

Have you cleared the round: YES

ROUND 2:

Platform: ZOHO meeting (Coding round)

Round details: This round contains 5 basic coding questions. Interviewer will be watching you and will ask questions at the end and you should explain your code clearly

Time Interval: 2 hours*

Areas covered: OOPS, Linked lists, Arrays, Strings

Result announcement: Within an hour and followed by next interview

Your Comments: In this round you can use any programming language if it is Python don't use any libraries and packages but you can also choose C or C++

Have you cleared the round: YES

ROUND 3 :

Platform: ZOHO meeting (Long Coding)

Round details: This round contains 1 long coding question. All the functions involved in ATM are given as a document and we are required to code based on the requirement and conditions mentioned there. The whole code has to be completed and explained

Time Interval: 2 hours + Explanation takes time

Areas covered: OOPS

Result announcement: Between 9:30pm to 12:30pm

Your Comments: Make sure you have practiced implementation of OOPS concepts. At each round you will have an indication whether you are selected for the next round or not.

Have you cleared the round: YES

ROUND 4 and 5:

Platform: ZOHO meeting (Technical Interview)

Round details: This is a technical interview; it starts from your projects followed by technical questions in your projects and beyond that.

Areas covered: OOPS, Data Structure, Projects

Time Interval: 2 hours/round

Result announcement: Within an hour and followed by next interview

Your Comments: If you have more content in your resume and projects, be clear in the technology used and concepts in the areas of interest. If you are very strong in the projects and experience mentioned in your resume you can drive the whole interview only with your resume. If you are selected you will be told to wait for the next round

Have you cleared the round : YES / NO

ROUND 6 :

Platform: ZOHO meeting (HR Interview)

Round details: This round starts with projects, Intern experience and ends with basic HR questions

Time Interval: 20 min

Result announcement: On the same day between 9:30pm to 12:30pm

Your Comments: Show the correlation between your skills and the role you have opted for.

Have you cleared the round: YES

AREAS TO PREPARE : Basic Data Structures, OOPS

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :
AK Agarwal Aptitude series (YouTube)
HackerRank, Leetcode

OVERALL EXPERIENCE : Good

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

PLACEMENT AND TRAINING CELL

PLACEMENT YEAR 2021-2022

NAME	:	PRADEEP KUMAR S
ROLL NUMBER	:	1733017
DEPARTMENT	:	MSc (Decision and Computing Science)
EMAIL ID	:	spradeepkumar29@gmail.com
CONTACT NUMBER	:	8825562240
COMPANY NAME	:	Zoho Corp
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	Software Developer
SALARY (CTC)	:	7 LPA
INTERN OFFERED ?	:	YES
BOND	:	NO
HAVE YOU PLACED ?	:	YES

*(Please comment this section **in detail** to guide your juniors in bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 :

Platform: Zoho platform

Round details: Aptitude and Programming

Areas covered: Aptitude questions are covered from the area of Time and Distance, Alligation or mixture, problems on train etc. Programming questions were asked like guess the output , Debug the code, Code Complexity analysis.

Have you cleared the round : YES **ROUND 2 :**

Platform: Zoho Meet

Round details: Programming (Duration: 3hrs)

Areas covered: Problem Solving

Have you cleared the round : YES

Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH
Loops	Write a program to reverse a given number? (If the input is 8 byte integer,output should be print in 8 bytes not in exponential)	Finding remainder: rem=input%10, Finding reverse: rev = rev*10+rem Updating number: input = input/10; perform above steps till input>0.
Recursion	An ATM machine has 10 notes each of denomination Rs 100, Rs200, Rs 500. Given an amount to withdraw , list all the possible ways the amount?	It's very similar to the coin change problem. The only difference here is we keep track of those 10 notes in each denomination. Pass as an array of 10 notes in each denomination whenever we include decrement the value by 1 after the calls executes increment by 1
Functions	Given two integer arrays of size m and n as input, write a function that finds the sum of all uncommon entries?	Create a two unordered_set on the first array and second array. while traversing on the first array using the “find” function in the second hashset, find whether the element is present or not. if not present sum the elements and similar to second array.
Functions and Data Structures	Given a string containing the characters ‘(‘ and ‘)’, find the length of the longest valid parentheses substring? ()()()-6 (())(()() - 4	Use a stack to store the index of open brackets. The first element of the stack provides an index before the beginning of a valid substring.

2d- Arrays	The input string is written in a zigzag pattern on a given number of rows . Print zig zag string in a single line. Input: s="ZOHOISHIRING", N=3 output:"ZIROOSIIGHHN"	First and last rows , index will increment by the value of i=i+2*(n-1). For the middle rows index will increment as i+= 2*(n-rowNum-1)
Matrix rotation	Rotate a 45 degree by the "n" user inputs?	i gave my solution but not passed for some test cases

Your Comments: I coded in C++. C/C++/Java is preferable when I finished each question, the interviewer asked me to test the different possible test cases and he asked me the time and space complexity of each solution. When you get stuck in between you can ask the interviewer for a hint.

ROUND 3 :

Platform: Zoho Meet

Round details: Technical Interview (Duration: 1.45 hrs)

Areas covered:OOPs, data structures, Operating Systems, Logics , Algorithms, Academic Projects

Your Comments:While answering each question be clear and confident, try to explain using simple examples.

Have you cleared the round : YES
Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH
	Given an array arr[] having 4 integer digits only. The task is to return the maximum 24 hour time that can be formed using the digits from the array. Eg: arr[ ] = {1,2,3,4} Output: 23:41	Create an unordered_map and store the frequency. And check it in decreasing order. The first digit of hours exists in the range [2 to 0] and decrements the digit occurrence by 1. In the second digit of hour if the 2 is taken so the chance will be in the range of [4-0]. if the one is taken, the chance will be the [9-0]. First digit of minutes must be from the range [0, 5] and the second digit of minutes must be from the range [0, 9].
Operating Systems	1)What is the race condition? How will you resolve it? 2)What is semaphore lock or mutex?	

	3)Concurrency, Best Scheduling algorithm 4)Deadlock prevention, Bankers algorithm 5)Asked about paging and segmentation concepts.	
C and C++	Questions from left and right shift operators? what is static, extern, register?	
Data structures	Given a social media application and asked me to get track of the first 100 posts and if posts exceed older posts will be deleted. And Asked me to give a better solution and suitable data structure to implement this?	Using Queue or circular linked list we keep track of the first 100 newer posts.Using circular list insertion will be O(1) Time Complexity. And queue also will be O(1) time complexity
Data structures	Basic questions from Heap, Trees, linked lists,Searching and their complexity analysis?	
	Asked about my academic projects	
	Given n non-negative integers representing an elevation map where the width of each bar is 1, compute how much water it is able to trap after raining? eg: arr[ ]=[0, 1, 0, 2, 1, 0, 1, 3, 2, 1, 2, 1] output : 6	It's a trapping rainwater problem. First we have compute the leftmax of each element in a array and compute the rightmax of each element in a array finally compute min(leftmax,rightmax) - arr[i](array element) and sum the elements.

ROUND 4 :

Platform: Zoho Meet

Round details:General HR interview

Have you cleared the round : YES
Details about Questions on 4th round:
1) Long-Term Goal 2) Why Zoho?

3) Did you have any offers?
4) Where do you see yourself in 5 years?
5) How do you manage failures?
6) What's your salary expectations?
7) What programming language do you know?

AREAS TO PREPARE :

- Aptitude
- C/C++/Java

- Data Structures and Algorithms
- Be thorough with your resume
- Operating Systems and OOPS concepts.

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

- IndiaBix
- Geeks for Geeks
- Leetcode/Hackerrank
- Youtube Videos (Abdul Baari, CS dojo, Take you forward).

OVERALL EXPERIENCE :

The overall experience was good. The interviewers were friendly and helped us to arrive at solutions provided that we explain the logic well. They showed no rush in getting the answers quick and we had enough time to think and provide the answer. The interviewers not only expect technical skills but also the communication skills,They expected the candidate to be clear and confident in their answers.

GENERAL TIPS :

- Take your time while you answer.
- Be strong in the basic concepts of Data Structure , C,C++, Operating Systems, OOPS and DBMS.
- Even if you don't know the answer, try to solve it.

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

PLACEMENT AND TRAINING CELL

PLACEMENT YEAR 2021-2022

NAME	:	KISHOREKUMAR K
ROLL NUMBER	:	1802089
DEPARTMENT	:	B.E. MECHANICAL ENGINEERING
EMAIL ID	:	kishore155dk@gmail.com
CONTACT NUMBER	:	7904688545
COMPANY NAME	:	ZOHO
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	SOFTWARE DEVELOPER
SALARY (CTC)	:	7 LPA
INTERN OFFERED ?	:	YES
BOND	:	NO
HAVE YOU PLACED ?	:	YES

*(Please comment this section **in detail** to guide your juniors in bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 : Online Test

Platform: Zoho Survey

Round details: Aptitude – General & Technical

Have you cleared the round : YES

ROUND 2 : Short Coding

Platform: Zoho Meeting with screen sharing.

Round details: 5 programs; Duration – 3hrs

Try solving at least 3 programs out of 5.

Have you cleared the round : YES

Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH
	Arrange array elements in the descending order of their frequency.	
	Sort the elements of an array in the odd index in ascending order and the elements in the even index in descending order.	
	Given a linked list that contains 0,1 and 2. Sort this linked list such that it contains 0s first, then 1s and then 2s in single loop.	
	For the given number of rows, write a program to print the pattern mentioned in the example.	
	Eve is sending a chat message to Adam, the message is split into packets with different sizes. At the Adam end, device receives the packets in the different order (not in the order in which it was sent). The device should show the exact message in the same order to Adam which was sent by Eve. Print the message in the correct order and identify the buffered packet which has the maximum length?	

ROUND 3 : Advanced Coding

Platform: Zoho Meeting with screen sharing.

Round details: Write an ATM code for Account Balance, Withdraw, Deposit and Statement of account.

Your Comments: Duration – 3hrs

Have you cleared the round : YES

ROUND 4 : Technical Interviews and General HR

Platform: Zoho Meeting

Round details:

Technical Interview 1 : Duration : 45 min

Questions were raised majorly from resume and about the projects. Some basic programming questions were asked.

Technical Interview 2 : Duration : 1 hr

2nd technical Interview was focused completely on my projects. Questions were asked majorly from my projects.

Some general questions like,
Why not higher studies?
What you know about Zoho?
Why preferred IT industry rather than Mechanical Core Companies?
were also asked.

General HR : Duration : 30 min

Tell me about yourself.
Tell me about your family.
Why ZOHO?
Why don't prefer higher studies? were asked.

Have you cleared the round : YES

AREAS TO PREPARE :

Aptitude and Programming Concepts.

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

Geeks for Geeks, Indiabix

OVERALL EXPERIENCE :

The short coding and advanced programming round were held on a single day. The 2 technical interviews were held on the next day. The technical HR team was friendly. It was a long interview process, and the overall experience was good.

GENERAL TIPS :

Even though they specify durations for every round, there will be no time limit. So, need of rushing. People with good coding experience and able to find logics for given problems will have the upper hand. Maintain a good impression with the HRs throughout the process. Speak frankly and honestly and do not say HR answers that some YouTube videos suggest. Answer every general question what you really feel.

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE -641014.

PLACEMENT AND TRAINING CELL

PLACEMENT YEAR 2021-2022

NAME	:	RADHIKAA R
ROLL NUMBER	:	1803110
DEPARTMENT	:	BE EEE
EMAIL ID	:	radhikaa1303@gmail.com
CONTACT NUMBER	:	9791415311
COMPANY NAME	:	ZOHO
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	
SALARY (CTC)	:	
INTERN OFFERED ?	:	YES
BOND	:	NO
HAVE YOU PLACED ?	:	

*(Please comment this section **in detail** to guide your juniors in bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 : APTITUDE

Platform: Zoho Survey

Details about Questions on 1st round:

General aptitude questions like profit & loss,trains,time & work etc were asked.There were 15 pseudocode questions ,they were quite time consuming if you practice it you can clear it easily.

Have you cleared the round : YES

ROUND 2 : SHORT CODING

Platform: Zoho meeting

Round details: Short coding

Areas covered: Problem solving , Basic programming questions

Your Comments:

This round is a One-to-one round where they'll ask you to share your screen and type the code in Notepad or Online compilers(No IDE is allowed).The instructions in the question paper said C/C++ was allowed.They gave 5 questions and asked to solve. They'd ask you to explain the solution as you code them and ask why you wrote a certain line/logic. So be strong in the logic you apply and answer them with confidence. They might expect an optimized solution so be strong in time complexities and code optimization.

Have you cleared the round : YES
Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
	Arrange array elements in descending order of their frequency	Checked each element is smaller than the other and printed it	
	Sort elements of array in odd index in ascending order and even index in descending order	Used odd and even logic to get order in a loop	
	sort linked list with zeros,1s and 2s in a single loop	Using traversal	
	pattern program		

	To print a message in given order and identify the maximum length of it	Using string concept	

ROUND 3 : ADVANCED CODING

Platform: Zoho meeting

Round details: Advanced coding

Have you cleared the round : YES

Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
	ATM Process 1.Load cash to ATM 2.Show Customer details 3.Show ATM process *check balance *withdraw money *transfer money *to print mini statement	Using Arrays and structures concept	

ROUND 4 :TECHNICAL AND GENERAL HR

Platform: Zoho meeting

Have you cleared the round : YES

Details about Questions on 4th round:

*Tell me about your Project
*Which concepts in C you know very well? *Difference between circuit breaker and isolator *What is synchronous condenser?
*What is semiconductor and its types?
*What is capacitance?
*What is laser diode and its real time applications?
*What are types of rectifiers and one example? *What is the real time application of multidimensional array?
*What is linked list?

*Given Concept of Programming and asked to tell which concept of data structures can be used to reduce time complexity of the program *Where transistors can be used?

AREAS TO PREPARE :

1.General aptitude
2.Practice programming questions
3.Data structures and algorithms
4.Core concepts

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

1.Hackerrank
2.Indiabix
3.Geeksforgeeks

OVERALL EXPERIENCE :

The whole process was quite smooth from start to end. Interviewers were friendly.

GENERAL TIPS :

- Be thorough with what you have mentioned in resume
- Practice coding daily to get optimize solution to code easily
- Be confident while you answer the question

COIMBATORE INSTITUTE OF TECHNOLOGY

CONTACT NUMBER	:	8124419534
COMPANY NAME	:	ZOHO
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	SOFTWARE DEVELOPER
SALARY (CTC)	:	7lpa
INTERN OFFERED ?	:	YES
BOND	:	NIL

HAVE YOU PLACED ? : NO

*(Please comment this section **in detail** to guide your juniors in bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 :

Platform: Zoho recruit

Round details: consists of aptitude and programming sessions.

Areas covered: basic aptitude and c programming

Your Comments: This round is for 1 hour so one will enough time to solve the questions and all the aptitude and programming output questions are from basic topics.

Have you cleared the round : YES
Details about Questions on 1st round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)

ROUND 2 :

Platform: Zoho meet

Round details: Basic Live Coding round

Areas covered: Strings ,arrays and some basic dsa questions

Your Comments: Try to solve the code with a better approach as they also concentrate on how one is approaching the code.Try to interact with the HR to check whether you are approaching the problem in a correct manner.

Have you cleared the round : YES
Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)

1.	Input : aaabbcdd Output: a3b2cd2		
2.	To check whether the password(string) is valid or invalid by using certain conditions.		

ROUND 3 :

Platform: Zoho meet

Round details: Advanced coding round

Areas covered: Real time problem statements

Your Comments: Try to split the problem into small parts and solve one by one to get the output easier.

Have you cleared the round : YES / NO
Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
1	Develop a whatsapp Chatbot This question is given in different sub modules like 1)Add a user 2)delete a user 3)send a message to the user 4)delete a message that sent to the other user 5)block the user 6)unblock the user 7)create a group etc.,	I didn't solve the entire problem but I have solved some modules using structures to store user data ,messages and other informations and to send and receive the message and to display the chat history.	

ROUND 4 :

Platform: Zoho meet

Round details: Technical interview

Areas covered: Basics of C programming ,basics of networking and puzzles

Your Comments: Basic knowledge in the C programming and your resume is enough to clear this round

Have you cleared the round : YES / NO
Details about Questions on 4th round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)

AREAS TO PREPARE :

- C programming
- Aptitude

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

- Hackerrank platform to solve C programming
- RS Aggarwal Book for aptitude

OVERALL EXPERIENCE :

This interview process is smooth and the HR will be very patient during the live coding round.

GENERAL TIPS :

Be strong in C programming and practice coding daily to crack the interview.

COIMBATORE INSTITUTE OF TECHNOLOGY

COMPANY NAME	:	ZOHO Corporation
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	Software Developer
SALARY (CTC)	:	
INTERN OFFERED ?	:	YES
BOND	:	NO

HAVE YOU PLACED ? : Intern + PBC

*(Please comment this section **in detail** to guide your juniors in bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 :

Platform: ZOHO had their own software

Round details: This round consists of both quantitative and technical aptitude. There were around 40 questions.

Areas covered: Java, Output Snippets, OOPS, Quantitative apti.

Your Comments:

Have you cleared the round : YES
Details about Questions on 1st round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Quantitative aptitude			
Java			
Output Snippets			
OOPS			

ROUND 2 :

Platform: ZOHO Meeting

Round details: It was a short coding round.The round lasted for 4hours

Areas covered: Coding round

Your Comments: HR gave me 6questions and I was able to solve 4questions. HR was so friendly and clarified the doubts I had. He also allowed me to skip a question to solve it later.

Have you cleared the round : YES

Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Problem Solving	Reverse a number including both negative and non-negative integers. Input: -123 Output: -321		
Problem Solving	Print 'yes' if the input is opened and closed with paranthesis simlutaneously. i/p: ((())) o/p: Yes, i/p: (())) o/p: No	Used two conditions, counted each paranthesis and calculated them.	
Problem Solving	I barely remember the question, but it was about comparing values. I used many loops and conditions to solve this question.	Brute force method	
Problem Solving			

ROUND 3 :

Platform:ZOHO Meeting

Round details: Technical Round, Duration – 1hour

Areas covered: Project description, OOPS, DBMS, DS

Your Comments: HR asked me to present my resume and asked questions from it.

Have you cleared the round : YES
Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Project	Questions were asked from the 2proj. I mentioned.		
OOPS	Properties of OOPS with real time examples.		
DBMS	Basic questions		
DS – Linked list	2 questions were asked to solve(pseudo code) and i couldn't solve one in that		

AREAS TO PREPARE : Problem Solving, OOPS, DBMS, DS.

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

1. Hackerrank
2. Javatpoint
3. GeeksforGeeks

OVERALL EXPERIENCE :

The overall experience was good and the HR was so friendly

GENERAL TIPS :

Be clear in the technical concepts added in the resume. Try to solve more questions on hackerrank in problem solving. Be bold and confident in answering the questions.

SALARY (CTC)	: 5.6 LPA
INTERN OFFERED ?	: YES

BOND : NO

HAVE YOU PLACED ? : YES

*(Please comment this section **in detail** to guide your juniors in bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 :

Platform: Zoho Survey

Round details: Programming & Aptitude Questions (Duration : 2 hours)

Areas covered: Aptitude questions from all topics and also the programing questions in the multiple choice question formats.

Have you cleared the round : YES

ROUND 2 :

Platform: Zoho meeting

Round details: short coding (Duration : 3 hours, 7 questions, Live coding)

Your Comments: Try to solve the questions based on the exact output required.

Have you cleared the round : YES

Details about Questions on 2nd round:

QUESTION
1)Write a program to find the nearest distance from 1's in a 2D binary array (diagonal traversal not allowed) Inputs: Matrix size (max 5 rows 5 cols), Matrix elements row wise. Outputs: Formatted matrix.
2) Given a list of numbers, arrange them in their number names ascending alphabetical order (dictionary order). Assumptions: i. Only positive numbers will be given. Input range is 0 to 99. ii. Duplicate numbers are treated as separate and output must repeat them. eg. If 2,3,2 is given, it should print Three, Two, Two as output. iii. All numbers will be given as a single input from the terminal with comma separated. Spaces if given shall be ignored
3) Given a set of elements and 2 search elements, find the minimum distance between the elements in the given array. The array may have duplicate values, however the search elements must be different.

Assumptions: 1. Distance calculation direction can either be forward or reverse. L.e., In a set (1,2,3,4) Distance between 1 & 3 is the same as 3 & 1 (-2) ii. The array should not be treated as circular. L.e., Distance between 4 & 1 in set (1,2,3,4) should be 3 and not 1.
4) There are N number of people in a group who play a game by standing in a circle. The group starts counting from one and each person who counts a multiple of x (0<=x<=N/2) will be eliminated and the group starts counting again. The game stops when the number of people remaining are less than x. Write a program to print the people who will be eliminated in the order of their elimination for a given N,x combination.
5) Given two strings of the same length. Compare the strings and print all pairs of substrings (min 2 char) that do not match with each other. Print them for both the strings, that do not match with the other string.
6) Given a 2D matrix (max size 10x10), starting from top left and ending at bottom right, print the path which willgive the maximum sum - Note: You can travel only in right and down directions

ROUND 3 :

Platform: Zoho meeting

Round details: Long coding round(Duration : 3 hours, Live coding)

Have you cleared the round : YES

Details about Questions on 3rd round:

QUESTION	SOLUTION / HOW DID YOU APPROACH
consider there are only two flights, each identified by a unique number say 101, 102. Your program should be generic enough to handle any number of flights Flight seats are categorized under two types namely Economy and Business Class.Each flight has 6 Business seats and 12 Economy seats. There are 6 seats in a row. 3 seats on either side of the pathway (refer the image below for more details). First row seats are for Business Class, second and thrid row are for Economy class. Base price of an Economy Class ticket is INR 1000 and for Business Class it is INR 2000.In a single booking, any number of tickets on a single class shall be booked 6. Each booking should be identified by a unique auto generated BookingID. This Id is unique across all flights. Surge pricing: After each successful booking, price of the ticket increases by INR 100 for Economy class and INR 200 for Business class on successive booking irrespective of any number of cancellations in between. Price increase is per flight basis. Along with each. Passenger Meal cost INR 80 per ticket get from the user if they required meal. Cancellation cost Rs 200 per seat.	Created class for each flights and used different objects for each bookings.

ROUND 4 :

Platform: zoho meeting

Round details: Technical interview (comprises of 3 rounds)

Areas covered:

Mini project in Detail
Difference between Data structures and DBMS,
Basic concepts of structures like types of data Structures, trees, Linked list, array, shortest path algorithms, sorting algorithms
Oops concepts in python (polymorphism, encapsulation with example),
Overriding and Over loading,
What is DBMS, joins, Why DBMS, difference between DBMS and file system,What is redundancy?
Basic questions on Java (difference between final & finalize, pointers, Garbage collection in java)

Have you cleared the round : YES

ROUND 5 :

Platform: zoho meeting

Round details: General HR interview (comprises of 3 rounds)

Details of questions covered:

Mini project
About your family, Strength and weakness
3 puzzle questions
Your greatest failure, achievement
What do you know about ZOHO?

Have you cleared the round : YES

AREAS TO PREPARE :

Keep continuous coding practice and have good knowledge on the concepts of Data Structures, DBMS and Oops.

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

Aptitude concepts on IndiaBix, Freshers world

Programming HackerRank, Leetcode

OVERALL EXPERIENCE :

Live coding rounds are little hard to clear, remaining technical rounds, general HR rounds are easy to crack.

And also the communications except the HR rounds are done in Tamil.

GENERAL TIPS :

Be confident and clear enough in whatever you are saying.

Try to answer all questions but if you have no idea for the question just politely say that you don’t know.

Practice coding daily.

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

COMPANY NAME	:	ZOHO CORPORATION
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	SOFTWARE DEVELOPER
SALARY (CTC)	:	7 LPA
INTERN OFFERED ?	:	YES
BOND	:	NO

HAVE YOU PLACED ? : YES

*(Please comment this section **in detail** to guide your juniors in bright way)*

COMMENTS ON SELECTION PROCESS:

ROUND 1:

Platform: Zoho Survey

Round details: General Aptitude and Programming Questions (Duration: 2hrs)

Areas covered: General Aptitude questions from all topics such as trains, averages, boat and streams etc., Programming questions were of the type find the output from given code snippet.

Your Comments: Questions were easy-medium type. If you have constant practice, then you will be able to clear this round easily.

Have you cleared the round: YES

ROUND 2:

Platform: -

Round details: Offline Assignment Question was given and was asked to complete within the duration of 1 day.

Areas covered: Modular Programming, OOPS (Languages allowed: C/C++/JAVA)

Your Comments: The round was a bit tough. But if you have practice on Application Oriented Questions, you can clear this round easily.

Have you cleared the round: YES

Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
OOPS	Food Delivery System	I used Java to solve this question. My entire approach was based on Modular programming that handles the delivery of products to the customers efficiently as required.	-

ROUND 3 :

Platform: Zoho Meeting

Round details: Explanation on my previous assignment question, few coding questions and some technical aspects.

Areas covered: Programming, DSA algorithms, DBMS, OOPS

Your Comments: This round comprised of basic testing of your programming and technical knowledge. So if you have your basics strong, you'll be able to clear it easily.

Have you cleared the round : YES

Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
CODING	Find the frequency of words in the given sentence.	Used hash map in c++	
CODING	Swap two numbers without temp variable	Used the basic formula to solve this question.	
CODING	Convert railway time(24H) to normal time(12H)	Used basic arithmetic and modulo operations.	
DSA ALGOS	Difference between array and linked list, Time complexities of various sorting algorithms, Algorithm techniques.		
SQL queries	Queries related to group by and order by were asked.		
OOPS	Implementation of four important concepts such as polymorphism, overloading, inheritance, abstraction.		
PROJECT	Algorithms and explanation of the project were asked.		

ROUND 4 :

Platform: Zoho Meeting

Round details: Few Coding questions and deep questioning on technical aspects.

Areas covered: Programming, DSA, DBMS

Your Comments: The round was tough. But if you have deep knowledge on DSA, DBMS you can clear this round,

Have you cleared the round : YES
Details about Questions on 4th round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
DSA	Questions from linked list, Queue and its application, Time complexities, Trees, Balanced BST and Algorithm Analysis		
DBMS	Normal forms ,Acid Properties ,Keys		
Coding	Create Binary Search tree from linked list.	Implemented characteristics of BST using nodes operation.	
Coding	Check whether given string is palindrome or not	Recursive way	
Coding	Quick Sort Implementation	-	

ROUND 5: HR Round

Platform: Telephonic Interview

Round Details: Questions regarding my hobbies, interests and some managerial questions to test my behavioural skills and it was more than a formal discussion with HR .He was so friendly and encouraging.

Have you cleared the round: YES

AREAS TO PREPARE:

- Competitive programming /Application Oriented Coding
- Data Structures and Algorithms
- Data Base Management
- OOPS
- SQL Queries

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

- Geeks for geeks
- W3schools
- Hacker rank
- Leetcode
- YouTube channels(Abdul bhari, jenny lectures)

- IndiaBix, Carreerride, FreshersPoint for Aptitude.

OVERALL EXPERIENCE :

The overall experience was good and interesting. Interviewers were so friendly and motivating so I could give my best out of it.

GENERAL TIPS :

- Be confident.
- Be strong in the basics of all the core subjects
- Practice coding regularly.
- Be strong in your area of interest.
- Be thorough in the projects you mentioned in your resume.

BOND	:	NO

HAVE YOU PLACED? : YES (Intern + PBC)

*(Please comment this section **in detail** to guide your juniors in bright way)*

***COMMENTS ON SELECTION PROCESS*:**

ROUND 1 : Level 1 - Programming & Aptitude

Platform: ZOHO Platform
Duration: 90 minutes
Areas covered:

This round contains around 20 to 30 questions from both general aptitude and programming aptitude. Usually, the general aptitude questions are from some of the basic topics like:

- Time
- Work
- Profit & Loss
- Speed and Distance
- Percentage
- Ratios and Proportions
- Average

and the remaining were output based questions from C programming and Java programming.

Your Comments:

Difficulty level is medium. Questions might be time consuming. We need to solve each question within 2 minutes. We need to be good at basics of C and Java to crack the snippet-based questions.

Have you cleared the round: YES

ROUND 2 : Level 2 - Programming round

Platform: Zoho Meeting Platform
Round details:

It is a face-to-face interview conducted for 3 hours; you will be proctored through a one-on-one meet using the Zoho meet app. The questions will be shared in the chat, and you will have to share your screen and video.

Areas covered:

Questions will be based on basic programming like C, C++, Java etc. You can clear this round with a good understanding of Loops, recursions, and knowledge of basic data structures.

Your Comments:

I can able to solve 3 questions in which questions were given after completing the given one. The question pattern and difficulty level changes for different batches. My HR gave me ample amount of time to work without intervene and also suggests some modifications and tested the program result for multiple test cases.

Have you cleared the round: YES

Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Strings	You are given a string moves that represents the move sequence of the robot where moves[i] represents its i'th move and moves[i+1] represents no of moves. Valid moves are 'R' (right), 'L' (left), 'U' (up), and 'D' (down). Given the initial position. Find the destination after performing the given moves in string. Example: **Input:** string: 'R2L1D2' Initial position: (5,2) **Output:** (6,0)	Used loops and if else statements and check whether the direction is right or left or up or down and perform add & sub of x & y values. The no of moves can also be 2 digits like 'R11'	
Dynamic Programming	You are given an array prices[i] is the price of a given stock on the i'th day. You want to maximize your profit by choosing a single day to buy one stock and choosing a different day in the future to sell that stock. Return the maximum profit you can achieve from this transaction. If you cannot achieve any profit, return 0. **Input:** prices = [7,1,5,3,6,4] **Output:** 5 **Explanation:** Buy on day 2 (price = 1) and sell on day 5 (price = 6), profit = 6-1 = 5. Note that buying on day 2 and selling on day 1 is not allowed because you must buy before you sell.		https://leetcode.com/problems/best-time-to-buy-and-sell-stock/
Dynamic Programming	You were given a array. Array index starts at 1. We need to check every element is unique or not. If its non-unique value we need to normalize the array so that every element must be unique. Steps to normalize: for first time change the non-unique values as its index position and check whether array is normalised or not, if not then increment the value one by one and check whether array is normalised or not after each increment. Input: 12345 Output: 12345 Input: 12234 Output: 15234 Explanation: 2 changes to '2' itself because its index position is 2, not unique so incremented up to 5.	Using loop and conditions, and setting flag values we can solve it easily.	

ROUND 3: Advanced Programming Round

Platform: Zoho Meet app

Round details:

This round conducted for 2 and half days from morning 9 am to 6 pm like office hours.

Areas covered:

One simple programming question was given on first day. Then for the next 2 days I need to develop a web page using Tomcat server and MySQL database.

Your Comments:

I had no idea about Tomcat server. HR given me ample amount of time to self-study about this topic and gave me suggestions when I find difficulty in launching the host and connecting databases using eclipse tool. They checked whether I can able to learn new topics and adaptable. Even if you don't know anything, don't panic and ask for help when you struck and remember to explain what are all the difficulties or bugs you faced while creating the website and how you rectify it while explaining to the HR. We need to speak clearly about what we have done.

Have you cleared the round: YES

Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Arrays	Given the no of bus terminuses and array represents the distance of intercity bus connections. We need to find the minimum distance from intercity connection to nearest bus terminus. Input: Bus terminuses: 4 Intercity connection: [2,4,5] Output: 1	Explanation: minimum distance from possible bus terminus to intercity connections is **[1,0,1,0]** i.e., intercity '2' is min distance (2-1) to bus terminus '1' & intercity '2' is min distance (2-2) to bus terminus '2' & intercity '4' is min distance (4-3) to bus terminus '3' & intercity '4' is min distance (4-4) to bus terminus '4'. And maximum possible distance that cover all bus terminus from intercity connections is '1'.	
Web Development	Host the website using Tomcat server. Create login page and check for authentication.	Used Eclipse tool to host the server. Web page created using Java and HTML.	To connect eclipse tool: https://www.youtube.com/watch?v=UBOZgNxsiwA

Database	Connect to MySQL database ad fetch details and display it to webpage.	Used JSP to fetch details from database.	
Web Development	Redirect to other page when browser hits '404' page error	Add error page tag to web.xml file	

ROUND 4 : Technical Interview

Platform: Zoho Meet App

Round details: This round lasted for 45 minutes.

Areas covered:
Mostly questions were from my resume and projects.
And questions from Data structures and DBMS.

Have you cleared the round : YES
Details about Questions on 4th round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
DBMS	Given a statement and asked to write schema with normalisation conditions.	Created schema without updation and deletion anomalies.	

ROUND 5 : Technical Interview

Platform: Zoho Meet App

Round details: This round lasted for 45 minutes.

Areas covered: Puzzles and DBMS. Four Puzzles given. I can able to solve three questions.

Have you cleared the round: YES

Details about Questions on 5th round:

QUESTION DOMAIN	QUESTION
DBMS	Joins Normalizations Anomalies keys

Puzzles	1] https://www.geeksforgeeks.org/puzzle-27-hourglasses-puzzle/ 2] https://www.geeksforgeeks.org/puzzle-measure-4l-using-given-3-buckets/ 3] https://puzzling.stackexchange.com/questions/183/twelve-balls-and-a-scale 4] Aptitude data interpretation question.

AREAS TO PREPARE:

DBMS, SQL, Coding, DSA, Puzzles and Aptitude.

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS:

- Geeksforgeeks : All purpose
- Leetcode : Coding
- Career ride : YouTube video for aptitude
- Indiabix : Practice questions for aptitude
- Javatpoint, Interview Bit : Technical concepts overview

OVERALL EXPERIENCE:

My interview process really went very smooth. I was interviewed by single HR in all rounds.

I was given a lot of time to solve even an easy question. They only expect not to plagiarise and come up with our own solution.

If I was struck in the middle, HR gave me hints to solve. Also ask to modify when needed.

However, Zoho interview process will be quite different from other companies. In which Zoho is famous for its unique approach in finding talents and work culture. Also, process will be different under each HR.

GENERAL TIPS:

Do not Plagiarise

Don’t panic if you don’t know the thing, just be loyal and tell like “I will look into it” or “I will read about it”. Because questions will be followed up based on your answers.

You should have good knowledge about things that you mentioned in your resume. Of course, every company will ask questions based on your resume. Don’t add things that you aren’t confident with.

If you add certifications in your resume then make sure you have hands on experience on it.

If you haven’t done so many projects, then elaborate more on the big project that you worked on and details like your role on it and algorithms or tools & technologies used.

Always wear a smile and same energy from start to end even if questions were weird, because it may be a chance of stress interviews.

Last but not least, don’t compare you with your friends and always look for improvements in you after each process. Sit and work out questions that you don’t know in previous rounds. It will build you.

---------- ALL THE BEST! ----------

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

PLACEMENT AND TRAINING CELL

PLACEMENT YEAR 2021-2022

NAME	: Nagalakshmi R
ROLL NUMBER	: 1807033
DEPARTMENT	: Information Technology
EMAIL ID	: nagalakshmivrk@gmail.com
CONTACT NUMBER	: 6379546541
COMPANY NAME	: Zoho Corporation
COMPANY TYPE	: NON-DREAM
JOB DESIGNATION	: Software Developer
SALARY (CTC)	:
INTERN OFFERED ?	: YES

BOND : NIL

HAVE YOU PLACED ? : NO

*(Please comment this section **in detail** to guide your juniors in bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 : ONLINE TEST

Platform: Thinkexam.com

Round details:

This round consist of MCQ questions which includes questions under the areas like General Aptitude, Technical Aptitude and programming questions. The total time duration given is 60 minutes.

Areas covered:

- General Aptitude : Percentages, Ages, Profit and Loss, Clock, Numbers, Calendars and some questions related to Algebraic expressions.
- Technical Aptitude : DBMS, Data structures.
- Programming Questions: To Find the output of code snippets.

Have you cleared the round : YES

Details about Questions on 1st round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)

ROUND 2 : CODING ROUND

Platform: Zoho Meet

Round details:

The round lasted for 1 hour 30 minutes. The interviewer asked to code 2 programming questions in 60 minute and checked the sample test cases. The entire code explanations were asked. Then the interviewer asked many questions related to java programming language.

Have you cleared the round : YES

Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Arrays	Replace the array elements with the first greater element than the current element. Eg: Input :2,4,5,8,3,13,15 Output :4,5,8,13,13,15,15.		
Sorting	In a string, print the missing vowel and then sort all vowels at beginning,then the consonants. Eg: Input : helloworld Output : eoodhlllrw		
Java	Question based on import statement and some packges..		
Java	Questions based on Java Collections.		
Java	Difference between String datatype and StringBuilder.		

ROUND 3 : ADVANCED PROGRAMMING ROUND

Platform :Zoho meet

Round details:

This round lasted for 3 hours. The interviewer asked me to develop an online order management system. The whole task was splitted into 10 modules which can be solved using OOPs concept in Java programming language. Then ,the interviewer asked some questions related to Java programming language, DBMS and asked to write SQL queries. Atlast, interviewer asked me to explain about my project.

Have you cleared the round : YES

Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Java Collections	Difference between HashMap and LinkedHashMap		
Java Collections	Difference between HashSet and List.		
DBMS	To Write schemas for the tables needed for developing the online order management system.		

DBMS	Primary Key and foreign key present in the tables.		
SQL	Questions related to views and Queries based on left outer join and group by.		
Web Technology	Basic questions on HTML and CSS.		

AREAS TO PREPARE :

- General Aptitude
- Logical reasoning
- SQL
- Programming Language of your choice.
- Datastructures
- DBMS

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

- Aptitude – Feel free to learn and careeride.com Youtube channel
  Indiabix , careerbless for practice.

- Data structures – Geeksforgeeks, Jenny's lectures- Youtube channel

- DBMS – Geeksforgeeks

- Java – Javatpoint

- Sql – Javatpoint,Hackerrank,W3schools.

- Coding – Hackerrank , Leetcode ,Geeksforgeeks.

OVERALL EXPERIENCE :

The overall experience is good. The interviewers were very friendly, so that it was easy for me to answer the questions. The interviewers were of testing both my logical approach towards the problem as well as the basic knowledge in programming language.

GENERAL TIPS :

- Have a strong understanding in the basic concepts of the subjects and the programming language of your choice and have a good knowledge on your project.

- If you are unaware of some questions, don’t panic . Inform the interviewer that you are not familiar with the topic in a polite way.

- Try to answer the question clearly with a real time example.

- Have a clear idea about the role and company before appearing for the interview.

- Be bold while answering the questions.

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

PLACEMENT AND TRAINING CELL

PLACEMENT YEAR 2021-2022

NAME	:	VIGNESH S
ROLL NUMBER	:	2051033
DEPARTMENT	:	MCA
EMAIL ID	:	vikiwillrock@gmail.com
CONTACT NUMBER	:	8807232807
COMPANY NAME	:	Zoho Corp
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	Software Developer
SALARY (CTC)	:	Internship + PFB
INTERN OFFERED ?	:	YES
BOND	:	NO

HAVE YOU PLACED ? : YES

*(Please comment this section **in detail** to guide your juniors in bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 : APTITUDE

Platform: Zoho survey (Unproctored test, similar to google forms)

Round details: Aptitude - General and technical (C - Trace output, flowchart tracing), No negative marking.

Areas covered: All

Your Comments: The general aptitude is easy if you have practiced it previously. The tracing output questions can end up taking most of your time. No theory questions were asked. The focus was on C. General aptitude questions like Profit/loss, trains, etc were asked. Technical apti was quite time consuming. There were no CS Theory questions but they asked questions like find the output of the program, trace the flowchart and find the output, find the buggy line in the code, etc. There were 10 Apti questions and 15 find output of the program.

Have you cleared the round : YES

ROUND 2 : SHORT CODING

Platform: Zoho Meeting(Similar to GMeet) with Screen Sharing. (NO IDE)

Round details: Short Coding

Areas covered: Problem Solving, Basic Programming questions.

Your Comments: This round is a One-to-one round where they'll ask you to share your screen and type the code in any IDE or Online compilers. Any programming language is allowed. This round have 5 questions. They'd ask you to explain the solution as you code them and ask why you wrote a certain line/logic. So be strong in the logic you apply and answer them with confidence.

Have you cleared the round : YES

ROUND 3 : ADVANCED CODING

Platform: Zoho Meeting(Similar to GMeet) with Screen Sharing. (NO IDE)

Round details: Long Coding

Areas covered: Basic Arrays, Looping, Hash Function in JAVA.

Your Comments: It took me around 5 hours to complete the whole application. There is no time limit. The mentor was asking me to do it using hash functions instead of objects. Here the key is that your patience. Whatever he ask try to solve don't say I don't know. He tests your patience in this round and how you trying to solve the problem.

Have you cleared the round : YES

Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
	I was given a task to develop an ATM Application. We should do a complete ATM application as we do it as mini project.		

ROUND 4 : TECHNICAL HR

Platform: Zoho Meeting(Similar to GMeet) with Screen Sharing. (NO IDE)

Your Comments: The Technical Hr will question all the basic questions from all the subjects which you know and which you learnt from the academics. Its took me around 3 hrs to complete this round. He came across subject by subject. So be strong in all the basics of yours subjects.

Have you cleared the round : YES

Details about Questions on 4th round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
	About the projects I have done		
	Some questions related to java,c,c++,dbms,python like exception handling, oops concepts.		

ROUND 5 : GENERAL HR

Platform: Zoho Meeting(Similar to GMeet) with Screen Sharing. (NO IDE)

Your Comments: The General Hr was about the projects in depth. He questioned me like why your project was not done in proper SDLC manner and why didn't you sell your project.

Have you cleared the round : YES

AREAS TO PREPARE :

1. General aptitude, C aptitude.
2. Basic and medium level knowledge in programming
3. Good programming and optimizing skills to pass over technical hr round

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

- GeeksforGeeks
- IndiaBix
- HackerRank

OVERALL EXPERIENCE :

Good and fully technically stuffed questions from start to end of the process.

GENERAL TIPS :

➢ Be ready to code for any given questions.
➢ C apti questions were quite tough , geeksforgeeks will be helpful in this concern.
➢ Try to build your codes in more optimized way, as technical hr is fully based on that.
➢ Be thorough about the projects that you have done and skills mentioned in the resume.
