COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

PLACEMENT CELL

PLACEMENT YEAR 2022 - 2023

NAME	:	Riyaz Ahamed S
ROLL NUMBER	:	1905042
DEPARTMENT	:	B.E. Computer Science and Engineering
EMAIL ID	:	sriyazahamed29@gmail.com
CONTACT NUMBER	:	9150528060
COMPANY NAME	:	Zoho Corporation
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	Member Technical Staff
SALARY (CTC)	:	8.4 LPA
INTERN OFFERED ?	:	YES
BOND	:	NO
HAVE YOU PLACED ?	:	YES

*(Please comment this section **in detail** to guide your juniors in a bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 :

Platform: Offline

Round details: General and Technical Aptitude

Areas covered:

1.General Aptitude - Work and Time, Ratio, Speed, Distance,Permutation and combination, percentage probability, Alligation and Mixture

2.Technical Aptitude – Trace the output for given code snippet. Codes were in C language

Your Comments:
This round consists of 20 aptitude questions(10 General + 10 Technical). There won't be any options. We have to write the answer directly on the paper.

Have you cleared the round : YES

(Note: There were different project teams came for the drive. After round 1 shortlisted students were split into groups and selected by different teams. Each team had their own way of conducting the further rounds. For me the next three rounds were face to face interview . In face to face interview I was given problems in different domains and asked to write the code in paper more preferably in C, C++, Java.)

ROUND 2 :

Platform: Offline

Round details: Face to Face Interview

Areas covered : Arrays, Recursion,Linked list

Your Comments: The interviewer gave lot of time to solve each problem. They mainly focussed on the way I tried to solve the problem rather than the exact solution. After giving solution and if the solution was not optimized they told to optimize it.

Have you cleared the round : YES

Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Sorting	To sort array which consists only of 1's and 0's	Traversed the array and found the count of 0's and 1's. Again traversed the array and filled the array based on the count value of 0's and 1's	
Recursion	Find 2^n for given 'n' in an most optimized way.	Used Recursion. They interviewer asked to get the solution in O(log n).	
Array		Two pointer Approach	
Linked List	Reverse the linked list		

ROUND 3 :

Platform: Offline

Round details: Face to Face interview

Areas covered: Recursion, Matrix, Trees

Your Comments: same as round 2. But the difficulty increased a little.

Have you cleared the round : YES

Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Mathematics	Solve sin(x)= x – x^3/3! + x^5/5! – x^7/7!+ ….x^n/n! for given n	Reused the previous term's numerator (x^i-2) and denominator (i-2)! to find the current term's numerator (x^i) and denominator i!. By doing this we get the optimized solution	
Matrix	Find determinant of matrix	Used recursion	
Binary Tree	Boundary traversal of Tree		
Binary Tree	Connect all nodes at the same level. No extra space like stack should be used.		

ROUND 4 :

Platform: Offline

Round details: Face to Face interview

Areas covered: Mathematics and Puzzle

Your Comments: Same as above two rounds.

Have you cleared the round : YES
Details about Questions on 4th round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Mathematics	Given 2 opposite coordinates of a rectangle and a point. We should find if the point lies inside the rectangle		
Puzzle	There are 100 doors in a row, all doors are initially closed. A person walks through all doors multiple times and toggle (if open then close, if close then open) them in the following way: In the first walk, the person toggles every door In the second walk, the person toggles every second door, i.e., 2nd, 4th, 6th, 8th, … In the third walk, the person toggles every third door, i.e. 3rd, 6th, 9th, … Likewise, In the 100th walk, the person toggles the 100th door. Which doors are open in the end?		https://www.geeksforgeeks.org/puzzle-16-100-doors/

After clearing Round 4 , I was selected for summer internship. They told that based on my performance in summer internship I would get full time employee offer with package of 5.6 LPA or 7 LPA or 8.4 LPA.

AREAS TO PREPARE :

- General Aptitude:
  Work and Time, Ratio, Speed, Distance,Permutation and combination, probability,percentage, Alligation and Mixture.
- Technical aptitude : C programming
- Data structures and Algorithms : Arrays , Linked List, Trees, Recursion and sorting algorithms
- OS and DBMS (For our team questions were not asked from this. But other teams were asked)

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

General Aptitude : Indiabix website

Data structures and Algorithm : Geeksforgeeks, Tutorialpoint, Javatpoint

Coding: Leetcode

OVERALL EXPERIENCE :

The Selection process went very smoothly. The interviewer gave the problem and describe the problem statement. I was given ample of time to solve.

INTERNSHIP EXPERIENCE:

The summer internship / evaluation was held for 2 weeks. A mentor was assigned to me. He gave me references and link materials for core Java . It has five units namely basics of Java , oops, string handling, exception handling and collection framework. The mentor asked me to study those concepts deeply. During evaluation I was given code snippet and asked to trace output/ debug. The code snippets were very challenging and if we studied the concepts thoroughly we could crack it easily.

Next I was asked to design class design for various systems like Cab Booking System, Automobile System and Bus Reservation Sytem. They asked me to design using appropriate inheritances and abstractions in an efficient way.

At the end of two weeks I had General HR interview. It was all basic questions like “tell me about yourselves”, “Are you able to relocate to Chennai?” , “What’s your salary package expectation?”. After one week I got selected as full time employee.

GENERAL TIPS :

Try to solve atleast 2 problems (1 easy and 1 medium) daily in Leetcode. Practice aptitude problems regularly. Study the core CS subjects like OS and DBMS deeply. After you reach some reasonable level in coding and problem solving, try dynamic programming problems.

ALL THE BEST FOR YOUR PLACEMENT AND YOUR CAREER

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

PLACEMENT CELL

PLACEMENT YEAR 2022 - 2023

NAME	: JORRYN D
ROLL NUMBER	: 1907017
DEPARTMENT	: BTech INFORMATION TECHNOLOGY
EMAIL ID	: jorryndaniel17@gmail.com
CONTACT NUMBER	: 9488342746
COMPANY NAME	: ZOHO
COMPANY TYPE	: NON-DREAM
JOB DESIGNATION	:
SALARY (CTC)	: 5.6 LPA
INTERN OFFERED ?	:YES
BOND	: NO

COMMENTS ON SELECTION PROCESS :

ROUND 1: Aptitude

Platform: Offline

Round details: General and technical aptitude (10 questions each).

Areas covered: General aptitude questions were mixed and from all topics. Technical aptitude had mainly snippets of code where we had to find the output.

Your Comments: Technical aptitude questions could be time consuming. No negative marking, so try to attend every question.

Have you cleared the round: YES
Details about Questions on 1st round:

ROUND 2: Short Coding

Platform: Dev C++

Round details: Short Coding

Areas covered: Problem solving, dynamic programming, greedy algorithm.

Your Comments: A mentor monitors this round. Number of questions are subject to change. Explain how you approached the problem and your code. If you do not have time to complete explain the method you could try.

Have you cleared the round : YES

Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Greedy algorithm	Minimum number of platforms required for a railway station		https://www.geeksforgeeks.org/minimum-number-platforms-required-railwaybus-station/
Stack	Print matrix in antispiral format		https://www.geeksforgeeks.org/print-matrix-antispiral-form/
Greedy algorithm	Minimum number of coins		https://www.geeksforgeeks.org/greedy-algorithm-to-find-minimum-number-of-

			coins/

ROUND 3: Long Coding

Platform: Dev C++

Round details: Long coding.

Areas covered: OOPs concepts implementation in Java/C++.

Your Comments: Form a clear idea on how to create the application using classes and objects. The question contains many parts.

Have you cleared the round : YES

Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
OOPs concepts	Design and implement a restaurant billing system for m number of orders and n number of foods. A food item should consist of ID, name, and price. A customer can order multiple food items. Order should consist of date and food ids, number of plates per food, and order type. There are 2 types of orders (dine in/delivery). In the case of delivery, delivery charges will apply and it will depend on the distance of delivery location. Create proper data structure to create food details and order details. Populate the data and display the following. 1. Add new food items. 2. Take new orders. 3. Generate bill for an order. Your bill should consist of food price, CGST(2.5%) and SGST(2.5%) and total amount for every food. food price + CGST + SGST = Total food price. 4. Save all the bill information in database tables. 5. Get total selling amount (price, CGST, SGST, Total) for a particular day. 6. Get total selling amount (price CGST, SGST, Total) for a particular month.	I used classes and objects to implement this system.	https://github.com/rocketvisnu/Zoho-Taxi-booking-Application/blob/master/zohoTaxiApplication.cpp

ROUND 4: Technical and general HR

Platform: Face to face interview

Round details: Technical and general HR

Areas covered: Questions mostly based on projects mentioned in resume.

Your Comments: Be confident with everything mentioned in your resume and have a calm approach to questions asked.

Have you cleared the round : YES
Details about Questions on 4th round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Academic Projects	Questions from projects mentioned in resume.		
Puzzle	Jar with contaminated pills puzzle	I gave a solution where the balance has to be used twice.	https://www.geeksforgeeks.org/puzzle-7-find-the-jar-with-contaminated-pills/
General HR	Long term and short term goals, family background,		

AREAS TO PREPARE:

1. General and technical aptitude.
2. Programming (dynamic, greedy algorithm)
3. OOPs concepts implementation
4. Problem solving

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

GeeksforGeeks
Javatpoint
IndiaBIX for technical and general aptitude

OVERALL EXPERIENCE:

The Zoho interview is a two-day process, so there is not much time for preparation between the rounds. The mentors were very friendly and encouraged us to find optimised solutions for the programs. Rounds are subject to change and everyone has different questions or even different rounds.

GENERAL TIPS:

- Explain your method of approach to the mentors before coding in the third round.
- Try to optimise your solution.
- Clarify your doubts before starting to code.
- Have a calm approach to every problem.

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

PLACEMENT CELL

PLACEMENT YEAR 2022 - 2023

NAME	:	LOGANATHAN D
ROLL NUMBER	:	1905092
DEPARTMENT	:	B.E CSE
EMAIL ID	:	logan05012001@gmail.com
CONTACT NUMBER	:	9585714043
COMPANY NAME	:	ZOHO CORP
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	JAVA DEVELOPER
SALARY (CTC)	:	7LPA
INTERN OFFERED ?	:	YES
BOND	:	NO

*(Please comment this section **in detail** to guide your juniors in a bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 :

Platform:
General and Technical Aptitude

Round details:
We were given a question bank which has 10 Technical Aptitude questions and 10 General Aptitude questions. The questions have no options, we need to calculate answer and fill in the space provided. We were given enough time.

Areas covered:
Technical Aptitude questions were based on macros, recursion, basic c, c++, debugging and sorting.General Aptitude was based on Speed distance, simple and compound interest, train, work and time and few other topics.

Your Comments:
You should be very strong in programming fundamentals.Trace the recursion relations when you solve recursive algorithms. While learning sorting algorithms, try tracing for given inputs. Practice aptitude questions regularly to solve them quickly.

Have you cleared the round : YES

ROUND 2 :

Platform:
Peer coding

Round details:
I was allotted to a mentor and he gave me 7 coding questions one by one and asked me to provide the optimized logic followed by the code. I need to write down the code in the paper.

Areas covered:
Basic array problems, Strings, Math, Recursion, Linked list.

Your Comments:
Try solving problems on basic array, math, recursion and identify the patterns among them. When given with new coding question try to think of devising the solution from the pattern that you'd solved earlier.

Have you cleared the round : YES

Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Sorting	Given an array nums with n objects colored red, white, or blue, sort them in-place so that objects of the same color are adjacent, with the colors in the order red, white, and blue.	Used 3 pointers, one for 0, and other for 2 and one for traversing array. Check for	https://leetcode.com/problems/sort-colors/

	We will use the integers 0, 1, and 2 to represent the color red, white, and blue, respectively.	appropriate conditions and swap among them. (Dutch National Flag Algorithm)	
Array	Equilibrium index of an array	Found total sum of array first. Now iterated from first and calculated left sum and once left sum is equal to total sum - left sum(right sum) returned the index.	https://www.geeksforgeeks.org/equilibrium-index-of-an-array/
String	Given a binary string consists of 1s and 0s, we need to find the length of largest binary string that can be formed that has alternative 0s and 1s.	Count the number of 1s and 0s.if both counts are equal return the length of given string, else take the minimum among two and return (2*min+1)	
Linked list	Recursively Reversing a linked list by passing a single pointer	We return the pointer of next node to his previous(current) node and then make the previous node as the next node of returned node and then returning the current node. We first traverse till the last node and making the last node as the head node of reversed linked list and then applying the above procedure in the recursive manner.	https://www.geeksforgeeks.org/recursively-reversing-a-linked-list-a-simple-implementation/
Maths	Write a program to calculate pow(x,n)	Checked n is even or odd, based on the condition made recursive calls and multiplied accordingly	https://www.geeksforgeeks.org/write-a-c-program-to-calculate-powxn/

ROUND 3 :

Platform:
Peer Coding

Round details:
This round was same as previous round, but the level of difficulty of questions were complex than previous round.

Areas covered: Maths, Trees

Your Comments:
Once you feel comfortable with easy problems, start solving problems with medium level difficulty.

Have you cleared the round : YES
Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Maths	Find the sine value of the number given the sin x formula.	Stored the previous results of numerator and denominator. Using them calculated current results	https://learnetutorials.com/c-programming/programs/sinx-value
Maths and Recursion	Determinant of a Matrix	Traversed row and column and calculated determinant of a sub matrix using recursion.	https://www.geeksforgeeks.org/determinant-of-a-matrix/
Binary Tree	Boundary traversal of a binary tree	Print the left boundary nodes. Print all leaf nodes from left to right. Print the right boundary nodes.	https://www.geeksforgeeks.org/boundary-traversal-of-binary-tree/
Binary Tree	Connect nodes at same level		https://www.geeksforgeeks.org/connect-nodes-at-same-level/

ROUND 4 :

Platform:
Peer coding

Round details:
The questions were of medium difficulty level.

Areas covered:
Maths, Puzzles

Your Comments:
When preparing for ZOHO, concentrate on math related problems.

Have you cleared the round : YES
Details about Questions on 4th round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Maths	Check whether two rectangles overlap each other or not.	If else conditions to check whether any coordinate of one rectangle lie inside coordinates of another rectangle.	https://www.geeksforgeeks.org/find-two-rectangles-overlap/

AREAS TO PREPARE :

1. Data structures and Algorithms
2. General and Technical aptitude
3. C programming for technical aptitude

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

1. General aptitude - careeride, indiabix, R.S Agarwal
2. Technical aptitude - indiabix, geeksforgeeks
3. Coding Practice - Leetcode (Top interview questions), Fraz 250 questions sheet
4. Learn Data structures and Algorithms - Geeksforgeeks self paced DSA course, Geeksforgeeks blogs, medium blogs, leetcode discuss forum.
5. Operating system, Computer Networks and Database Management System - javatpoint, interviewbit, geeksforgeeks last minute notes

OVERALL EXPERIENCE :

The interviewer was so friendly and provided enough time to think and arrive at the solution. They provided hints when I stuck at a problem for a long time. The language is of your choice but they want us to write the pseudocode.

GENERAL TIPS :

1. Solve atleast one problem a day with full understanding
2. Stay consistent while practicing data structures and algorithms
3. Be very strong in fundamentals
4. Have a good resume
5. Be confident while answering during the interview process
6. Ask for sample test cases when you didn’t understand the question properly.

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

CONTACT NUMBER	:	9677903787
COMPANY NAME	:	ZOHO CORP
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	Software developer
SALARY (CTC)	:	7 LPA
INTERN OFFERED ?	:	YES
BOND	:	NO

*(Please comment this section **in detail** to guide your juniors in a bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 :

Platform: Offline test

Round details: General and Technical Aptitude

Areas covered: Output of C program, Recursion, speed and distance, pipes and cistern.

Your Comments: This was a medium difficulty round. Practice aptitude questions daily to clear this round.

Have you cleared the round : YES

ROUND 2 :

Platform: Offline

Round details: Coding Round

Areas covered: Math, Arrays

Your Comments:
There were 7 coding questions given and we can solve in any order. Choose the easiest problem since all problems carries equal weightage. They won't allow you to use any inbuilt package or functions

Have you cleared the round : YES
Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
String	Check if one string is a rotation of another	I used a for loop to compare the first character and if the first character matches, then check for the whole string	A Program to check if strings are rotations of each other or not - GeeksforGeeks
Stack	Check is the given string contains valid parenthesis	I used stack to push the open parenthesis and popped out, when iterated over a closed parenthesis	Valid Parenthesis String - LeetCode

Math, Array	Pythagorean triplet. Check if there is a three positive integers a, b, c such that $a^2+b^2 = c^2$	I used three for loops to check the given condition.	
Sorting	Sort the array containing 0,1,2	I used three pointers to iterate and sort in o(n) time.	Sort Colors - LeetCode
Math	Find the given array is an Arithmetic Progression or Geometric Progression	Check if the difference and ratio between the consecutive elements of the array are same or not.	Check if elements of array can be arranged in AP, GP or HP - GeeksforGeeks
Greedy	Given arrival and departure time of the trains, find the maximum number of platforms needed.	Sort them based on arrival time then check if the arrival time of the next train is smaller than the departure time of the previous train if it is smaller then increment the number of the platforms needed otherwise not.	Minimum Number of Platforms Required for a Railway/Bus Station - GeeksforGeeks

ROUND 3 :

Platform: Offline

Round details: Long coding Round

Areas covered: Graph

Your Comments: It is a medium difficulty round they will give you a question and then add other queries along with previous question

Have you cleared the round : YES
Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Graph	Given the position of treasure and treasurer, Find the minimum distance need to reach the treasure	The sum of the difference between x coordinate and y coordinate is the answer.	
Graph	The previous question along with if there were some pitfalls in the path you should avoid those pitfalls.	I used BFS to calculate the smallest distance	

ROUND 4 :

Platform: Offline

Round details: General HR round

Areas covered: Puzzles

Your Comments: This is a medium difficulty round. They asked some technical questions and 2 puzzles during this round.

Have you cleared the round : YES

AREAS TO PREPARE :

1) DATA STRUCTURES AND ALGORITHMS
2) OPERATING SYSTEM
3) COMPUTER NETWORKS

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

- General and technical Aptitute – IndiaBix
- Coding practice - Leetcode (top interview questions + top liked questions)
- Data structures and Algorithms – Geeks for Geeks DSA course
- Operating systems – Geeks for geeks
- Networks – Nesoacademy youtube channel
- OOPS –Geeksforgeeks + interviewbit interview questions.
- DBMS – w3 schools (also covered interview questions in interviewbit)

OVERALL EXPERIENCE :

Interviewer is friendly provided enough time to think and arrive at the solution. Time management is very important. They expect you to pass all their test cases.

GENERAL TIPS :

- Practice competitive programming consistently.
- Keep your understanding of fundamentals in the above mentioned domains strong.
- Be confident.
- Keep your mind clear during the process.

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

PLACEMENT CELL

PLACEMENT YEAR 2022 - 2023

NAME	:	Sagolsem Hironika Devi
ROLL NUMBER	:	1905044
DEPARTMENT	:	CSE
EMAIL ID	:	sagolsemhironika@gmail.com
CONTACT NUMBER	:	7085771806
COMPANY NAME	:	Zoho Corp
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	Software Developer
SALARY (CTC)	:	8.4 LPA
INTERN OFFERED ?	:	YES
BOND	:	NO

*(Please comment this section **in detail** to guide your juniors in a bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 : Aptitude

Platform: Offline (pen and paper)

Round details: General aptitude 10 questions and technical aptitude 10 questions **(no multiple choices)**.

Areas covered: Average, Profit and loss, compound interest, program outputs, strings, recursion.

Your Comments: Be strong in general aptitude and fundamentals of programming. Beware that only coding is not enough, general aptitude also plays a major role.

Have you cleared the round: YES
Details about Questions on 1st round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
General aptitude	Based on profit and loss, average, percentage, compound interest.	General aptitude formulas and some short cuts to lessen time consumption.	
Technical aptitude	Program outputs	Analysed each step output and calculated the final output.	

ROUND 2 : Coding round

Platform: Any compiler (no internet)

Round details: Long coding.

Areas covered: Problem solving.

Your Comments: Trust the process, stick with whatever language you prefer and analyse the question properly and look for the way to solve it. I suggest you to be strong in fundamentals. For approach, we have to search for the most suitable one.

Have you cleared the round: YES

Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)

Problem Solving	A man has a bag with dimensions provided in the std input, he has to put two types of items, stone and balloon, each item has to be placed in the provided position of the bag, which should be the column number. If the position is already occupied, the item should be placed in the next column. Sample input: 3 4 //dimension of the bag S 2 - - - - - - - - - S - - B 2 - - - - - - - - - - - - - S B -	First, created a multi- dimensional array according to the provided dimensions of the box. Make the values of all the elements as "-" as to indicate empty. Then used conditions if the provided position of the item to be placed is "-", placed the item. Else, placed it in the next column unless the next column is also empty.	
Problem solving	Same as above but the bag is capable of taking many items at once. And if the provided position is full, the remaining items should be placed in the next column in reverse order. Eg: 3 4 //dimension of the bag S B B 2 - B - - - B - - - S - - S S B S 2 - B B - - B S - - S S S	Same approach as the previous question with some modifications. Here, the std input for the items to be placed is taken in strings format. And placed the items in the position unless it is not full, if its full the remaining items are placed in the next column.	

ROUND 4 : HR Interview

Platform: Face to face

Round details: General HR questions.

Areas covered: Personality questions and questions about why you want to join the company.

Your Comments: Be honest with your resume, be clear about your goal, be confident and don't be nervous.. Overall, honesty is the key.

Have you cleared the round : YES

AREAS TO PREPARE:

Problem solving, data structures, and recursion, debugging, general aptitude.

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

GeeksForGeeks, tutorialspoint, log2base2.

OVERALL EXPERIENCE:

The process was for 2 days. Overall experience was pretty good, mentors and the team members are very friendly. For the long coding, it was for 3 hours and we have to code as much questions as we can. The time is long compared to other companies, but its rather satisfying to be given enough time as there was no tension for time limit.

Zoho Intern:

It was 10 days summer internship. According to our performance in it, we will be evaluated. I worked on AWS services like Lambda, CloudFormation, S3, etc. (domain differ for every person). I was given tasks for everyday and I have to complete it and report it to the mentor. It was tough, as there is no good reference or exact solution available on the internet. So, reading the documents thoroughly, helped a lot. Despite of everything, it was pretty exciting to explore new things and not only that, the mentor

was very good and friendly. At the end of the internship, there was HR interview conductor by the HR team of the company.

GENERAL TIPS:

Practice coding at least 3 hours a day. Be strong with fundamentals and practice problem solving questions in any well know platform, like Hackerrank, Leetcode, HackerEarth, etc. For HR, be clear about resume and your goal, its about expressing how much you know yourself. As for this company, they'll evaluate us from our performance in the internship, so do well in it.

COIMBATORE INSTITUTE OF TECHNOLOGY

(GOVERNMENT AIDED AUTONOMOUS INSTITUTION)

CIVIL AERODROME POST, COIMBATORE-641014.

PLACEMENT CELL

PLACEMENT YEAR 2022 - 2023

NAME	:	PRATEEKSHA PK
ROLL NUMBER	:	1907031
DEPARTMENT	:	INFORMATION TECHNOLOGY

CONTACT NUMBER	:	9994021723
COMPANY NAME	:	Zoho Corporation
COMPANY TYPE	:	NON-DREAM
JOB DESIGNATION	:	
SALARY (CTC)	:	8.4 LPA
INTERN OFFERED?	:	YES
BOND	:	NIL

*(Please comment this section **in detail** to guide your juniors in a bright way)*

COMMENTS ON SELECTION PROCESS :

ROUND 1 :

Platform: Offline- Pen and Paper Test

Round details: General and Technical Aptitude.

Areas covered: Quantitative Aptitude (profit & loss, permutations and combinations, distance speed and time etc), C Programming and Algorithms,

Your Comments:
There were 15 general aptitude and 15 quants which were quite time consuming, so solve the easier questions first and then move on to tougher questions. We didn't have choices to choose from, you have to find the answers and write them in the blanks.

Have you cleared the round : YES

ROUND 2 :

Platform: Offline

Round details: Short Coding

Areas covered: Problem Solving, Basic Data Structures

Your Comments:
This round is quite easy to solve if you have good coding experience. There were questions of different difficulty levels for which you have to explain the flow of the code and optimise it. You can use any programming language and any online compiler. They will also ask you about any other solutions that are suitable for the questions, so try to optimise it as much as possible.

Have you cleared the round : YES / NO
Details about Questions on 2nd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Problem Solving	Find the sum of n Fibonacci numbers	Recursion	
Arrays	Given an array and a target number: Find the element that is closest to the number	Sliding window approach	
Problem Solving	Given the co-ordinates of two rectangles, find if they will intersect or not	Simple conditional statements	
Linked List	Implement a linked list and perform various operations that they tell you(on spot)		
Trees	Given a tree and two nodes, find if they are cousins or not		

ROUND 3:

Platform: Long Coding

Round details: Questions of hard difficulty level was given and we need to tell the approach and then write the pseudocode using pen and paper

Areas covered: OOPS- Application design, Problem Solving

Your Comments: Being Strong in logics and communicating your ideas clearly will help you to clear this round easily. Design the given application systematically and explain it clearly

Have you cleared the round : YES / NO

Details about Questions on 3rd round:

QUESTION DOMAIN	QUESTION	SOLUTION / HOW DID YOU APPROACH	REFERENCES (If any)
Problem Solving	Given two hexadecimal decimal numbers, add them without converting to any other number formats		
Problem Solving	Find the Square root of a non-square number without using any in built functionalities		
Design	Design a Hotel booking system using DBMS and write down the use cases of the application		

AREAS TO PREPARE :

C, problem solving, arrays, strings, basic mathematical concepts, sorting, searching, Basic Data Structures and Algorithms.

SITES / BOOKS YOU SUGGEST FOR PREPARATION FOR THE PROCESS :

- Indiabix / R.S. Agarwal for aptitude
- GeeksforGeeks, Hackerrank – interview preparation kit,
- Leetcode

OVERALL EXPERIENCE :

The interviewers were very friendly and encouraging. Be confident in your code and explain it clearly. Communicate with the interviewer regarding the problem and confirm what is expected. Being polite and practice is coding can help you to easily secure a Job at Zoho.

ZOHO INTERN :

At the end of the interview Process we were given an internship offer for 10 days. They gave us study materials and we were assessed based on our performance on the tasks and assessments they gave. The tasks are completely dependent on the team for which you are selected. We won't be having any direct answers in the internet or github. We have to refer the resources or documentation and do it on our own.

At the end of the internship, I had an HR round which was basically about my personal preferences and goals in my professional life and Salary preferences.

GENERAL TIPS :

The process was easy compared to other companies but it was long. Just be confident and clear in explaining your solution. Ask them your doubts and be polite. FTE conversion is based on intern performance, so perform well in the intern.
